

# Welcome to Madrid

**In Plaza de las Comendadoras you'll find Café Moderno, a historic, but renovated, establishment and an ideal place to chat over a coffee or long drink, both in its lounge and on its terrace, open all year round.**

Decorated with lights using LED technology, its relaxed ambience offers a complete audiovisual programme, presenting the work of plastic artists, photographers, illustrators, short film makers and fashion designers, among others. It also has a project that allows anyone who so wishes to present their audiovisual creations for free in the café itself, as well as to use the equipment available there (projector, screen, sound equipment and Wi-Fi connection).
