

Enrique Tierno Galván Park

A large park with three ponds traversed by three small footbridges. In this green area, you can leave the city behind while you stroll along its wide paths, where you'll find different tree species, and a great diversity of flora and fauna. It also has a sports circuit and two children's areas. What's more, it's home to the Planetarium and the IMAX cinema, closed since 2014.
