

Faunia

Faunia is an extensive themed and natural space with over 3,000 animals from 300 different species, divided over the recreation of 4 ecosystems and 19 themed areas adapted to each species, with their own habitat, temperature, light and humidity conditions. The park extends over 14 hectares with topography with lakes and ponds.

Visitors will be able to enjoy the extreme cold of the Antarctic, represented by the largest Polar Ecosystem in Europe, to the tropical heat of the Amazon jungle represented by the Jungle Ecosystem, as well as the mysterious world of night animals or the elegance of the butterfly kingdom and the majestic woods.

The park has several catering areas, a children's playground and a visit exhibiting reproductions of different dinosaurs.
