

La Fábrica Gallery

Created in 1995 to develop the contemporary cultural projects private initiative, which adds value to society, this space has featured photography, plastic arts, literature, film, music or performing arts projects.

Throughout its history, it has organised exhibitions, festivals, street programmes, books, magazines, calls, awards, grants, training programmes and other formats that have contributed to artistic dissemination.

La Fábrica opened this space in 2013, where cultural, training and creative activities are combined. It also has a shop selling diverse products created by young Spanish designers and artists, and a coffee where Mediterranean and Italian dishes can be savoured, as well as breakfasts and afternoon teas.
