

Blanca Berlín Gallery

Next to the Conde Duque Cultural Centre, we find this space that has become a reference point for photographic art in Madrid and nationally since its beginning in 2007, although it is also open to other formats.

The gallery started out with the aim of contributing to Spanish photography achieving the recognition it merits within the international artistic community. Amongst the gallery's artists, photographers such as Isabel Muñoz, Ouka Leele, Ramón Masats and José María Mellado stand out. An example of the gallery being open to other formats is the presence of the illustrators from The Children Pox duo in its portfolio of artists.
