

# Welcome to Madrid

**More than 30 years devoted to comics and to the acceptance of this centenarian art as a cultural alternative at the same qualitative and intellectual level as other literary genres.**

The ever-changing content of their stock makes it impossible to have a static catalogue of their products, since they receive weekly orders from the US and monthly batch from France. However, there is no doubt that this is one of the shops with the largest number of comics in the capital. Its repertoire includes both Hispanic authors and foreign ones, Manga and educational books about animation and drawing techniques or with information about this field.

Since this is a mainly visual discipline, Madrid Comics also gathers carefully selected books about illustration and art, design, film, animation, photography, posters or advertising, as well as a collection devoted to amateur publications, magazines and fanzines, and of course their famous “knick-knacks” with t-shirts and action figures dedicated to the major icons of this genre.

## Interest data
