

Welcome to Madrid

Since 1998, this bookshop has been a reference for enthusiasts of mountaineering, adventure and mountain sports in general. Its catalogue not only includes specialized books, handbooks, maps, guides and videos, but also a wide assortment of materials, ranging from backpacks and camera cases to GPS and other orientation gear, clothing, notebooks, etc.

Taking advantage of its privileged location in the heart of the **Literary Quarter**, in the establishment that had been occupied by another former book store from 1898 (of which much of the original furniture has been kept), this bookstore hosts gatherings where renowned figures of the world of mountaineering share with the public all of their risky experiences.
