

Equus

Equus focuses on riding and all the equipment needed for the sport. Rafael and Paco opened the shop over thirty years ago, since when it has become an institution for those interested in horses.

They have travelled all over the world looking for new products and quality goods at attractive prices. The effort has been worth while, as they now have customers all over Europe and in many other countries, including Argentina, Mexico, Colombia, Japan and Egypt.

Items made by top national and international brands such as Devoucoux, Stübben and Don Rodrigo can be found here, including saddles, head stalls, fly whisks and leg wraps, some following the latest trends and others in more traditional styles. They are made in the best long-lasting materials (leather, hide, nylon, etc.) and are available in different sizes (pony, cob, full).
