

Welcome to Madrid

This shop is ideal for those who like plants but don't have much time to look after them. There are plenty of suitable options for amateurs, while serious collectors can find practically any variety of cactus they want.

Cacto-Cacto is more than a shop where you can buy plants, as it also offers a range of additional services: cacti can be hired for filming, publicity, catering companies, private parties, hotels, fashion parades, weddings and trade fairs, or supplied for decoration in private homes and gardens, shops, etc. There is a home delivery service and cacti can also be sent by post to customers outside Madrid.
