

Welcome to Madrid

This tourist company offers the possibility to discover Madrid in a different and fun way through original guided visits.

These routes offer the opportunity to discover the mysteries, curiosities and legends that are hidden in the Austrias, Borbones and Las Letras quarters; or to discover the darkest side of the city with the routes on witchcraft or crimes and murders. For more dynamic people, there are gymkhanas throughout the city, in which you will discover incredible corners of Madrid through a series of clues, whilst competing against other groups. The visits are in reduced groups, making it a personalised experience. All types of activities adapted to the curriculum of educational centres are also offered to raise awareness of the city's treasures first-hand.
