

Welcome to Madrid

In the heart of the hip La Latina neighborhood, you can find this book- and record-store that in its beginnings was also a cafe, but is now fully devoted to independent fiction, comics, children's literature, books on music and records, mostly vinyl.

The store has two floors. The street-level floor is the proper store where you can find impeccable and special literary editions together with the national and some international independent records labels. The lower floor is where all sorts of cultural activities take place like book presentations, exhibitions, concerts, story- telling and many more other events.
