

Welcome to Madrid

The Barrio de las Letras district is home to this international contemporary art, street art and photography gallery, close to the CaixaForum. Its goals include the promotion of artists of great impact, who they select meticulously, taking an irreverent and differentiating line.

The gallery has a unique exhibition space, a perfect white cube, and the front of the building often features pieces by street artists from Madrid. It is an adapted venue with an access ramp for disabled guests. Furiosa Gallery is a space aimed at collectors, artists, and reputed art agents, where experiences and interests in national and international projects converge.

With several exhibitions a year, the gallery also participates in major national and international art fairs, and also collaborates with exhibitions around the world.
